#27 Kaunlaran St. Batasan Hills, Quezon City

Phone: 0955-150-3802

Email: [jerome.condes05@gmail.com](mailto:jerome.condes05@gmail.com)

29 yrs. old | January 05, 1996

Automation Programmer capable of managing technology projects from concept to completion with remarkable deadline. 6 years of experience. Strong analytical skills combined with experience in Engineering. Compatible team player through projects cycles, testing, and final implementation with excellent communication skills and have willingness to learn and adapt fast paced environment.

---

## WORK EXPERIENCE

---

### **OSP-ESCO International Inc.**

#### **I.T Automation Programmer**

March 2019 – Present (**Project sites:** SM, Ayala Malls NCR-Vis-Min, St. Lukes, BDO, RCBC)

- Major contributor to the successful development and implementation of hardware and software integration between smart meter technology and embedded controller to provide functional and large scale data monitoring.
- Work under direct supervision according to project scope of work such as conducting implementation of technology based on client requirements, programming, system integration, testing and commissioning, reporting, and preventive maintenance.
- Perform assigned task related to research and development in all its phases and familiarize the working principles of network devices, sequence of operations and the science behind of each technology.
- Configure, Test, Monitor and Troubleshoot end-user workstation hardware network.
- Supervise and lead a team for technical support and functional instruction to clients and thousands of devices throughout the Philippines and facilitate training and seminar with engineering team as part of project turnover.
- Participate in performing routine metering and system installation work and ensure appropriate documentation and technical report based on the work completed.

#### **Data Analyst**

- Major contributor to the development of a system using CPT Tool Sedona code editor and a microprocessor programmable controller design to develop and test embedded applications as data logging device that measures the temperature flow with history trend using HTML, CSS and Javascript for user interface with history trend using SQLite3Service database running.
- Gather and scrutinize data using specialist tools to generate information and interpret statistical information to help colleagues, clients and supervisor use it to make decisions about data and look for trends, patterns and anomalies within it.

- Used smart meter as data logging device to keep track real time energy consumption to fetch and generate data.

#### **Immix I.T Freelance**

February 25-29, 2023

- Assemble, Install, configure data center and check and troubleshoot of port type configuration.
- Work and coordinate with IT support team for and all network related support escalation.

---

### **EDUCATION**

---

2012 – 2017 Bachelor of Science in Computer Science **Asian Institute of Computer Studies**

2008 – 2012 North Fairview High School

2002 – 2008 San Diego Elementary School

---

### **SKILLS & QUALIFICATION**

---

- Programming: C#. C++ for Arduino microcontroller, CPT tool for procedural programming of embedded system applications and use for automation testing.
- Documentation, Testing and Networking Troubleshooting
- Project Management, Team Collaboration & Leadership.

---

### **TRAININGS & SEMINARS**

---

- Zuit Coding Bootcamp: Javascript Game Development Workshop (HTML,CSS,Javascript)
- Institute of Infrared Thermography
- DICT: Introduction to Internet of Things (IOT)
- The 4th Youth Congress on Information Technology SMX Convention Center. MOA
